

# PTFE

**Chemically inert  
Eurythermal  
Lasting  
Moisture-resistant  
Pliable  
Smooth  
Strong**

**PTFE hose (+ metal braid) can perform under high pressure, even with continuous flexing and vibration.**

**PTFE hose can tolerate an array of fluids.**

**PTFE hose can handle temperatures -100°F to +500°F (-73°C to +260°C).**

**Almost nothing can adhere to PTFE hose, ensuring fluid purity during transfer, high flow rates, and reuse ability. Coefficient of friction can be as low as 0.05.**

**Absorption of PTFE is less than 0.01%. PTFE is FDA approved for contact with food.**

**PTFE is unaffected by exposure or time.**
